

# Don't Let Noise Ruin Your Health

Working in noisy environments like factories, construction sites, and transportation can lead to more than just hearing loss. Prolonged exposure to loud noises can cause a decline in concentration, increased stress, and a higher risk of developing conditions such as dementia, hypertension, heart attacks, anxiety, and depression.

Continuous exposure to noise levels above 85 dB(decibels can significantly increase your risk of developing noise-induced hearing loss. This condition is entirely preventable.

## Hear Clearly, Work Safely

CLEAR360PRO reduces the risk of hearing loss and protects workers' health.

CLEAR360PRO is an industrial headset that combines high-quality sound with cutting-edge hearing protection technology. It enables you to hear ambient sounds while reducing noise, creating a safe and comfortable working environment.

# Hearing health is important for all workers.

Especially for employees working in noisy environments, hearing protection can also help maintain general wellness. Through our CLEAR360 PRO technology, we are highlighting the importance of hearing protection and working toward a healthier work environment.

## Hearing Protection with CLEAR360PRO

- **Hearing Protection:** Protect your hearing from loud noises and maintain long-term health.
- **Communication in the workplace:** Clear communication improves work efficiency and safety.
- **Injury prevention:** Ensures workplace safety through accurate recognition of environmental sounds.
- **productivity:** Effective listening modes optimize the work environment.

### What is CLEAR360...

Developed by the CLEAR360 team of physicians, acoustic engineers, and construction industry professionals from the Bon Jovi Acoustic Laboratory (BAL) in the United States, this industrial headset solves the problems of work sites working in high noise environments. Combining a high level of hearing protection, precise 360° sound positioning, and patented speech intelligibility algorithms already proven in aircraft and medical communication systems, CLEAR360 is lightweight, features Bluetooth connectivity for hearing protection, and offers 16 hours of battery life on a quick charge. CLEAR360 is lightweight, offers hearing protection via Bluetooth connectivity, and delivers 16 hours of battery life on a fast charge. It incorporates advanced new technologies that outperform even military-grade solutions.

\*BAL has patented voice technology focused on digital voice processing, spatial audio, and speech intelligibility.

## Why Choose CLEAR360 PRO?

We are convinced that CLEAR360 PRO is the best solution not only for workers exposed to noise, but also for their employers.

It can increase productivity while protecting health and safety.

Medical science has shown how important hearing protection is.

We want to help you implement CLEAR360 PRO technology in your workplace to create a healthier work environment.

Hearing protection is not just a precautionary measure, it is an investment in the well-being and productivity of your employees.

Create a safer and healthier work environment with CLEAR360 PRO.

## Health Effects of Noise

Noise exposure does not just affect hearing. Numerous medical studies have shown that it also has significant effects on general health, including

- Increased risk of dementia, hypertension, myocardial infarction
- Increased stress, increased hormonal activity, decreased sleep
- Heart disease: High risk of heart disease, especially from exposure to traffic noise
- Mental illness: anxiety, depression, decreased job satisfaction
